PROFILE

Computer Science undergraduate building AI-powered systems and self-hosted infrastructure. Experienced in designing scalable backend services, local-first applications, and privacy-focused software — from Flutter mobile apps to Electron desktop browsers.

EDUCATION

B.Tech in Computer Science — JK Lakshmipat University
Aug 2024 – May 2028

- Coursework: Machine Learning, DSA, Probability & Statistics, Databases, System Design

EXPERIENCE

Freelance Tech & AI Writer — Medium
Jan 2026 – Present

- Published 2+ technical articles on Linux, self-hosting, and AI tools; focused on practical, hands-on deep-dives
- Featured: "I Ran 4 Operating Systems on a 4 GB Home Server" and "30 Days Replacing Windows with Linux"

PROJECTS

CashWand — Personal Finance Tracker
Feb 2026 – Present

Flutter • Dart • SQLite • Provider • fl_chart • local_auth | github.com/Lakshya9461/Cashwand

- Architected an offline-first mobile app with a clean domain/presentation/data layer separation following TDD standards
- Implemented category-level budget engine with real-time warnings, biometric app lock, and .xlsx report export; shipped v1.0.1 on Android & iOS

Aegis Browser — Privacy Desktop Browser
Nov 2025 – Present

Electron • Chromium • JavaScript • HTML • CSS | github.com/Lakshya9461/Aegis-Browser

- Engineered a custom ad-blocking pipeline with 500+ domain filters and multi-level anti-fingerprinting to prevent cross-site tracking
- Designed secure context isolation via Electron preload bridge; built incognito sessions, tab suspension, download manager, and PiP video

Personal Home Server & Media Platform
Jun 2024 – Present

Debian Linux • Docker • Cloudflare Tunnel • Tailscale • Git

- Deployed and managed a self-hosted media and file-sharing stack with Dockerized services and Git-driven automation scripts
- Configured zero-trust remote access via Cloudflare Tunnel and Tailscale, eliminating public port exposure

Voice-Controlled AI Assistant
May – Jul 2025

Python • speech_recognition • pyttsx3 • Ollama REST API

- Built a modular voice assistant with local LLM inference via Ollama, extensible intent-handler architecture, and automation pipelines

SKILLS

Languages: Python, Dart, JavaScript, C, SQL
Frameworks: Flutter, PyTorch, Scikit-learn, Electron
Infrastructure: Docker, Linux, Cloudflare Tunnel, Tailscale, Git
Concepts: System Design, REST APIs, DSA, Clean Architecture, TDD
